

## PLTW Framework - Overview

PLTW Frameworks are representations of the knowledge, skills, and understandings that empower students to thrive in an evolving world. The PLTW Frameworks define the scope of learning and instruction within the PLTW curricula. The framework structure is organized by four levels of understanding that build upon each other: Knowledge and Skills, Objectives, Domains, and Competencies.

The most fundamental level of learning is defined by course Knowledge and Skills statements. Each Knowledge and Skills statement reflects specifically what students will know and be able to do after they've had the opportunity to learn the course content. Students apply Knowledge and Skills to achieve learning Objectives, which are skills that directly relate to the workplace or applied academic settings. Objectives are organized by higher-level Domains.

Domains are areas of in-demand expertise that an employer in a specific field may seek; they are key understandings and long-term takeaways that go beyond factual knowledge into broader, conceptual comprehension.

At the highest level, Competencies are general characterizations of the transportable skills that benefit students in various professional and academic pursuits. As a whole, the PLTW Frameworks illustrate the deep and relevant learning opportunities students experience from PLTW courses and demonstrate how the courses prepare students for life, not just the next grade level.

To thrive in an evolving world, students need skills that will benefit them regardless of the career path they choose. PLTW Frameworks are organized to showcase alignment to in-demand, transportable skills. This alignment ensures that students learn skills that are increasingly important in the rapidly advancing, innovative workplace.

## Essential Questions

---

- 1.1 - 1 What are some different types of occupations within the engineering pathway?
- 1.1 - 2 What are some common responsibilities of engineers?
- 1.1 - 3 Identify a mechanism in your household. Why do you think that particular mechanism is designed the way it is?
- 1.1 - 4 What are some strategies that can be used to make everyday mechanisms more efficient?
- 1.1 - 5 Describe one situation in which an engineer would want to include a mechanism with a mechanical advantage greater than one? What is the advantage in this case?
- 1.1 - 6 How could designing a solution to a mechanical problem without regard to efficiency be problematic?
- 1.2 - 1 Choose a specific energy production source. Explain why it is considered "clean." In what ways may it not be so "clean?"
- 1.2 - 2 How might innovation of current technology involved with energy production provide energy more efficiently?
- 1.2 - 3 What alternative energy source would be best implemented in your community? Explain why.

- 1.2 - 4 Choose a specific energy production source. What is one possible way that “lost” energy might be collected in your home or school and transformed for a usable purpose?
- 1.2 - 5 What are the advantages and disadvantages of wiring a house with either series or parallel circuits?
- 1.3 - 1 In what innovative ways could the efficiency of electricity production using solar cells be maximized throughout the day?
- 1.3 - 2 Describe how hydrogen fuel cells could become a viable way of producing energy for vehicles. What advancements in technology and infrastructure need to take place to make its usage more common?
- 1.3 - 3 A hydrogen fuel cell by itself is not sufficient to power much of anything in our society. How could fuel cells be configured to produce enough voltage and current to a system?
- 1.3 - 4 What are some materials in your home that prevent energy transfer from inside your home to the outside environment? Which of the three forms of energy transfer are they attempting to limit?
- 1.3 - 5 Which of the three forms of energy transfer are the materials in your home inhibiting the least? What could be done to change that?
- 1.4 - 1 How does a design team come to know what problem to solve?
- 1.4 - 2 Why is it important for the team to come to a consensus on the issues that arise? What are some reasons that the team leader should not dictate the direction of the group?
- 1.4 - 3 What are two possible ways that a team could come to a consensus in a disagreement over a solution to a problem?
- 1.4 - 4 Engineers follow the design process, when solving a problem. What possible problems might arise, if the design process is not followed?
- 2.1 - 1 Why is it crucial for designers and engineers to construct accurate free body diagrams of the parts and structures that they design?
- 2.1 - 2 Why must designers and engineers calculate forces acting on bodies and structures?
- 2.1 - 3 When solving truss forces, why is it important to know that the structure is statically determinate?
- 2.2 - 1 How does an engineer predict the performance and safety for a selected material?
- 2.2 - 2 What are the advantages and disadvantages of utilizing synthetic materials designed by engineers?
- 2.2 - 3 What ethical issues pertain to engineers designing synthetic materials?
- 2.2 - 4 What did you learn about the significance of selecting materials for product design?
- 2.2 - 5 How can an existing product be changed to incorporate different processes to make it less expensive and provide better performance?
- 2.2 - 6 How does an engineer decide which manufacturing process to use for a given material?
- 2.2 - 7 How do the recycling codes and symbols differ from state to state?
- 2.3 - 1 Why is it critical for engineers to document all calculation steps when solving problems?
- 2.3 - 2 How is material testing data useful?
- 2.3 - 3 Stress-strain curve data points are useful in determining what specific material properties?
- 2.4 - 1 What is a design brief? What are design constraints?
- 2.4 - 2 Why is a design process so important to follow when creating a solution to a problem?

- 2.4 - 3 What is a decision matrix and why is it used?
- 2.4 - 4 What does consensus mean, and how do teams use consensus to make decisions?
- 2.4 - 5 How do the properties and types of materials affect the solution to a design problem?
- 3.1 - 1 What are the advantages and disadvantages of using programmable logic to control machines versus monitoring and adjusting processes manually?
- 3.1 - 2 What are some everyday, seemingly simple devices that contain microprocessors, and what function do the devices serve?
- 3.1 - 3 What questions must designers ask when solving problems to decide between digital or analog systems and between open or closed loop systems?
- 3.2 - 1 What impact does fluid power have on our everyday lives?
- 3.2 - 2 Can you identify devices or systems that do not use fluid power that might be improved with the use of fluid power?
- 3.2 - 3 What are similarities and differences of mechanical advantage in simple machines and hydraulic systems?
- 3.2 - 4 Why are Pascal's Law, the perfect gas laws, Bernoulli's Principle, and other similar rules important to engineers and designers of fluid power systems?
- 3.3 - 1 What is a design brief? What are design constraints?
- 3.3 - 2 Why is a design process so important to follow when creating a solution to a problem?
- 3.3 - 3 What is a decision matrix and why is it used?
- 3.3 - 4 What does consensus mean, and how do teams use consensus to make decisions?
- 3.3 - 5 How do the properties and types of materials affect the solution to a design problem?
- 4.1 - 1 Why is it crucial for designers and engineers to use statistics throughout the design process?
- 4.1 - 2 Why is process control a necessary statistical process for ensuring product success?
- 4.1 - 3 Why is theory-based data interpretation valuable in decision making?
- 4.1 - 4 Why is experiment-based data interpretation valuable in decision making?
- 4.2 - 1 What are the relationships between distance, displacement, speed, velocity, and acceleration?
- 4.2 - 2 Why is it important to understand and be able to control the motion of a projectile?

Competencies, Domains, Objectives, Knowledge and Skills

Transportable Knowledge and Skills

Core workplace skills that students and workers need to acquire, that can be used across all stages of a career, and that, because of their universal utility, are transportable from job to job, from employer to employer, across the economy.

Career Readiness (CAR):

Engineers use professional skills and knowledge to pursue opportunities and create sustainable solutions to improve and enhance the quality of life of individuals and society.

CAR-A. Identify engineering disciplines and engineering expertise that are critical to the solution of a specific problem.

CAR-A.1 Describe the historically traditional disciplines of engineering, including civil, electrical, mechanical, and chemical.

|         |                                     |                          |                          |                          |                                     |                          |                          |                          |                                     |                          |                          |                                     |                          |
|---------|-------------------------------------|--------------------------|--------------------------|--------------------------|-------------------------------------|--------------------------|--------------------------|--------------------------|-------------------------------------|--------------------------|--------------------------|-------------------------------------|--------------------------|
| Lesson: | 1.1                                 | 1.2                      | 1.3                      | 1.4                      | 2.1                                 | 2.2                      | 2.3                      | 2.4                      | 3.1                                 | 3.2                      | 3.3                      | 4.1                                 | 4.2                      |
|         | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |

CAR-A.2 Explain that engineering disciplines continue to evolve and emerge as new interdisciplinary fields or sub-disciplines to better meet the needs of society. Examples include: Aerospace Engineering, Biomedical Engineering, Environmental Engineering, Computer Engineering, Structural Engineering, and Water Resource Engineering.

|         |                                     |                                     |                          |                          |                                     |                          |                          |                          |                                     |                          |                          |                                     |                          |

## Competencies, Domains, Objectives, Knowledge and Skills

Communication (COM):

Engineering practice requires effective communication with a variety of audiences using multiple modalities.

COM-A. Communicate effectively with an audience based on audience characteristics.

COM-A.1 Adhere to established conventions of written, oral, and electronic communications (grammar, spelling, usage, and mechanics).

|         |                                     |                                     |                                     |                                     |                                     |                                     |                          |                                     |                                     |                                     |                                     |                                     |                                     |
|---------|-------------------------------------|-------------------------------------|-------------------------------------|-------------------------------------|-------------------------------------|-------------------------------------|--------------------------|-------------------------------------|-------------------------------------|-------------------------------------|-------------------------------------|-------------------------------------|-------------------------------------|
| Lesson: | 1.1                                 | 1.2                                 | 1.3                                 | 1.4                                 | 2.1                                 | 2.2                                 | 2.3                      | 2.4                                 | 3.1                                 | 3.2                                 | 3.3                                 | 4.1                                 | 4.2                                 |

## Competencies, Domains, Objectives, Knowledge and Skills

### Collaboration (COL):

Demonstrate an ability to function on multidisciplinary teams.

COL-A. Facilitate an effective team environment to promote successful goal attainment.

COL-A.1 Describe the various individual roles and interdependencies of a collaborative team.

|         |                          |                          |                          |                                     |                          |                          |                          |                          |                          |                          |                                     |                          |                          |
|---------|--------------------------|--------------------------|--------------------------|-------------------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|-------------------------------------|--------------------------|--------------------------|
| Lesson: | 1.1                      | 1.2                      | 1.3                      | 1.4                                 | 2.1                      | 2.2                      | 2.3                      | 2.4                      | 3.1                      | 3.2                      | 3.3                                 | 4.1                      | 4.2                      |
|         | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |

COL-A.2 Describe the importance of team norms and help develop those norms for a team.

|         |                          |                          |                          |                          |                          |                          |                          |                          |                          |                          |                                     |                          |                          |
|---------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|-------------------------------------|--------------------------|--------------------------|
| Lesson: | 1.1                      | 1.2                      | 1.3                      | 1.4                      | 2.1                      | 2.2                      | 2.3                      | 2.4                      | 3.1                      | 3.2                      | 3.3                                 | 4.1                      | 4.2                      |
|         | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |

COL-A.3 Solicit, negotiate, and balance diverse views and beliefs to reach workable solutions.

|         |                                     |                          |                          |                                     |                          |                          |                          |                          |                          |                          |                          |                          |                          |
|---------|-------------------------------------|--------------------------|--------------------------|-------------------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|
| Lesson: | 1.1                                 | 1.2                      | 1.3                      | 1.4                                 | 2.1                      | 2.2                      | 2.3                      | 2.4                      | 3.1                      | 3.2                      | 3.3                      | 4.1                      | 4.2                      |
|         | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |

COL-A.4 Identify basic conflict resolution strategies and employ those strategies as necessary and appropriate.

|         |                          |                          |                          |                          |                          |                          |                          |                          |                          |                          |                                     |                          |                          |
|---------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|-------------------------------------|--------------------------|--------------------------|
| Lesson: | 1.1                      | 1.2                      | 1.3                      | 1.4                      | 2.1                      | 2.2                      | 2.3                      | 2.4                      | 3.1                      | 3.2                      | 3.3                                 | 4.1                      | 4.2                      |
|         | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |

COL-B. Contribute individually to overall collaborative efforts.

COL-B.1 Describe one's individual role and expectations of performance within the team.

|         |                          |                          |                          |                          |                          |                          |                          |                          |                          |                          |                                     |                          |                          |
|---------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|-------------------------------------|--------------------------|--------------------------|
| Lesson: | 1.1                      | 1.2                      | 1.3                      | 1.4                      | 2.1                      | 2.2                      | 2.3                      | 2.4                      | 3.1                      | 3.2                      | 3.3                                 | 4.1                      | 4.2                      |

### Ethical Reasoning and Mindset (ERM):

Successful engineering professionals exhibit personal and professional characteristics and behaviors that involve considerations of the impact of their work on individuals, society, and the natural world.

ERM-A. Assess an engineering ethical dilemma.

ERM-A.1 Explain that engineering solutions can have significantly different impacts on an individual, society, and the natural world.

|         |                          |                                     |                          |                                     |                          |                          |                          |                          |                                     |                          |                          |                                     |                          |
|---------|--------------------------|-------------------------------------|--------------------------|-------------------------------------|--------------------------|--------------------------|--------------------------|--------------------------|-------------------------------------|--------------------------|--------------------------|-------------------------------------|--------------------------|
| Lesson: | 1.1                      | 1.2                                 | 1.3                      | 1.4                                 | 2.1                      | 2.2                      | 2.3                      | 2.4                      | 3.1                                 | 3.2                      | 3.3                      | 4.1                                 | 4.2                      |
|         | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |

### Critical and Creative Problem-Solving (CCP):

The skills necessary for students to generate ideas and solutions to problems.

CCP-A. Demonstrate independent thinking and self-direction in pursuit of accomplishing a goal.

CCP-A.1 Plan and use time in pursuit of accomplishing a goal without direct oversight.

|         |                          |                          |                          |                          |                          |                          |                          |                          |                          |                          |                                     |                          |                                     |
|---------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|-------------------------------------|--------------------------|-------------------------------------|
| Lesson: | 1.1                      | 1.2                      | 1.3                      | 1.4                      | 2.1                      | 2.2                      | 2.3                      | 2.4                      | 3.1                      | 3.2                      | 3.3                                 | 4.1                      | 4.2                                 |

## Competencies, Domains, Objectives, Knowledge and Skills

CCP-B. Demonstrate flexibility and adaptability to change.

CCP-B.1 Adapt to varied roles, job responsibilities, schedules, and contexts.

|         |                          |                          |                          |                          |                          |                          |                          |                          |                                     |                          |                                     |                          |                                     |
|---------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|-------------------------------------|--------------------------|-------------------------------------|--------------------------|-------------------------------------|
| Lesson: | 1.1                      | 1.2                      | 1.3                      | 1.4                      | 2.1                      | 2.2                      | 2.3                      | 2.4                      | 3.1                                 | 3.2                      | 3.3                                 | 4.1                      | 4.2                                 |

CCP-C. Persevere to solve a problem or achieve a goal.

CCP-C.1 Describe why persistence is important when identifying a problem and/or pursuing solutions.

|         |                          |                          |                          |                          |                          |                          |                          |                          |                                     |                          |                                     |                          |                                     |
|---------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|-------------------------------------|--------------------------|-------------------------------------|--------------------------|-------------------------------------|
| Lesson: | 1.1                      | 1.2                      | 1.3                      | 1.4                      | 2.1                      | 2.2                      | 2.3                      | 2.4                      | 3.1                                 | 3.2                      | 3.3                                 | 4.1                      | 4.2                                 |
|         | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |

CCP-D. Explain and justify an engineering design process.

CCP-D.1 Explain that there are many versions of a design process that describe essentially the same process.

|         |                          |                          |                                     |                          |                          |                          |                          |                          |                          |                          |                          |                          |                          |
|---------|--------------------------|--------------------------|-------------------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|
| Lesson: | 1.1                      | 1.2                      | 1.3                                 | 1.4                      | 2.1                      | 2.2                      | 2.3                      | 2.4                      | 3.1                      | 3.2                      | 3.3                      | 4.1                      | 4.2                      |
|         | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |

CCP-D.2 Describe major steps of a design process and identify typical tasks involved in each step.

|         |                                     |                          |                          |                          |                          |                          |                          |                          |                          |                          |                          |                          |                          |
|---------|-------------------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|
| Lesson: | 1.1                                 | 1.2                      | 1.3                      | 1.4                      | 2.1                      | 2.2                      | 2.3                      | 2.4                      | 3.1                      | 3.2                      | 3.3                      | 4.1                      | 4.2                      |
|         | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |

CCP-D.3 Identify the step in which an engineering task would fit in a design process.

|         |                          |                          |                          |                          |                          |                          |                          |                          |                          |                          |                                     |                          |                          |
|---------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|-------------------------------------|--------------------------|--------------------------|
| Lesson: | 1.1                      | 1.2                      | 1.3                      | 1.4                      | 2.1                      | 2.2                      | 2.3                      | 2.4                      | 3.1                      | 3.2                      | 3.3                                 | 4.1                      | 4.2                      |
|         | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |

CCP-D.4 Document a design process in an engineering notebook according to best practices.

|         |                                     |                          |                                     |                          |                          |                                     |                          |                          |                                     |                          |                                     |                          |                                     |
|---------|-------------------------------------|--------------------------|-------------------------------------|--------------------------|--------------------------|-------------------------------------|--------------------------|--------------------------|-------------------------------------|--------------------------|-------------------------------------|--------------------------|-------------------------------------|
| Lesson: | 1.1                                 | 1.2                      | 1.3                                 | 1.4                      | 2.1                      | 2.2                                 | 2.3                      | 2.4                      | 3.1                                 | 3.2                      | 3.3                                 | 4.1                      | 4.2                                 |

## Competencies, Domains, Objectives, Knowledge and Skills

CCP-F. Synthesize an ill-formed problem into a meaningful, well-defined problem.

CCP-F.1 Explain the importance of carefully and specifically defining a problem or opportunity, design criteria, and constraints, to develop successful design solutions.

| Lesson: | 1.1                      | 1.2                      | 1.3                      | 1.4                      | 2.1                      | 2.2                      | 2.3                      | 2.4                      | 3.1                                 | 3.2                      | 3.3                                 | 4.1                      | 4.2                                 |
|---------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|-------------------------------------|--------------------------|-------------------------------------|--------------------------|-------------------------------------|
|         | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |

CCP-F.2 List potential constraints that may impact the success of a design solution. Examples include economic (cost), environmental, social, political, ethical, health and safety, manufacturability, technical feasibility, and sustainability.

| Lesson: | 1.1                      | 1.2                      | 1.3                      | 1.4                                 | 2.1                      | 2.2                                 | 2.3                      | 2.4                      | 3.1                      | 3.2                      | 3.3                                 | 4.1                      | 4.2                      |
|---------|--------------------------|--------------------------|--------------------------|-------------------------------------|--------------------------|-------------------------------------|--------------------------|--------------------------|--------------------------|--------------------------|-------------------------------------|--------------------------|--------------------------|
|         | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |

CCP-G. Generate multiple potential solution concepts.

CCP-G.1 Represent concepts using a variety of visual tools, such as sketches, graphs, and charts, to communicate details of an idea.

| Lesson: | 1.1                                 | 1.2                      | 1.3                                 | 1.4                      | 2.1                      | 2.2                                 | 2.3                      | 2.4                                 | 3.1                                 | 3.2                      | 3.3                                 | 4.1                      | 4.2                                 |
|---------|-------------------------------------|--------------------------|-------------------------------------|--------------------------|--------------------------|-------------------------------------|--------------------------|-------------------------------------|-------------------------------------|--------------------------|-------------------------------------|--------------------------|-------------------------------------|
|         | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |

CCP-H. Develop models to represent design alternatives and generate data to inform decision making, test alternatives, and demonstrate solutions.

CCP-H.1 Define various types of models that can be used to represent products, processes, or designs, such as physical prototypes, mathematical models, and virtual representations. Explain the purpose and appropriate use of each.

| Lesson: | 1.1                      | 1.2                      | 1.3                      | 1.4                      | 2.1                      | 2.2                      | 2.3                      | 2.4                                 | 3.1                      | 3.2                      | 3.3                      | 4.1                      | 4.2                      |
|---------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|-------------------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|
|         | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |

CCP-I. Select a solution path from many options to successfully address a problem or opportunity.

CCP-I.1 Explain that there are often multiple viable solutions and no obvious best solution. Trade-offs must be considered and evaluated consistently throughout an engineering design process.

| Lesson: | 1.1                      | 1.2                                 | 1.3                      | 1.4                      | 2.1                      | 2.2                      | 2.3                      | 2.4                                 | 3.1                      | 3.2                      | 3.3                      | 4.1                      | 4.2                      |
|---------|--------------------------|-------------------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|-------------------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|
|         | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |

CCP-J. Plan and execute an investigation to collect valid quantitative data to serve as a basis for evidence and to inform decisions.

CCP-J.1 Identify the data needed to answer a research question and the appropriate tools necessary to collect, record, analyze, and evaluate the data.

| Lesson: | 1.1                      | 1.2                      | 1.3                                 | 1.4                                 | 2.1                      | 2.2                      | 2.3                      | 2.4                                 | 3.1                      | 3.2                      | 3.3                      | 4.1                      | 4.2                      |
|---------|--------------------------|--------------------------|-------------------------------------|-------------------------------------|--------------------------|--------------------------|--------------------------|-------------------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|
|         | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |

# Competencies, Domains, Objectives, Knowledge and Skills

## Technical Knowledge and Skills

Every career field requires technical literacy and career-specific knowledge and skills to support professional practice.

Engineering Tools and Technology (ETT):

The practice of engineering requires the application of mathematical principles and common engineering tools, techniques, and technologies.

ETT-A. Using a variety of measuring devices, measure and report quantities accurately and to a precision appropriate for the purpose.

ETT-A.1 Explain and differentiate between the accuracy and precision of a measurement or measuring device.

|         |                          |                          |                          |                          |                          |                          |                          |                          |                          |                          |                          |                          |                                     |
|---------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|-------------------------------------|
| Lesson: | 1.1                      | 1.2                      | 1.3                      | 1.4                      | 2.1                      | 2.2                      | 2.3                      | 2.4                      | 3.1                      | 3.2                      | 3.3                      | 4.1                      | 4.2                                 |
|         | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |

ETT-A.2 Use dimensional analysis and unit conversions to transform data to consistent units or to units appropriate for a particular purpose or model.

|         |                          |                          |                          |                          |                          |                          |                          |                          |                          |                          |                          |                          |                                     |
|---------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|-------------------------------------|
| Lesson: | 1.1                      | 1.2                      | 1.3                      | 1.4                      | 2.1                      | 2.2                      | 2.3                      | 2.4                      | 3.1                      | 3.2                      | 3.3                      | 4.1                      | 4.2                                 |
|         | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |

ETT-B. Use a spreadsheet application to help identify and/or solve a problem.

ETT-B.1 Populate a spreadsheet application with data and organize the data to be useful in accomplishing a specific goal.

|         |                          |                          |                          |                          |                          |                          |                          |                          |                          |                          |                          |                                     |                          |
|---------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|-------------------------------------|--------------------------|
| Lesson: | 1.1                      | 1.2                      | 1.3                      | 1.4                      | 2.1                      | 2.2                      | 2.3                      | 2.4                      | 3.1                      | 3.2                      | 3.3                      | 4.1                                 | 4.2                      |
|         | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |

ETT-B.2 Use the functions and tools within a spreadsheet application to manipulate, analyze, and present data in a useful way, including regression analyses and descriptive statistical analyses.

|         |                          |                          |                          |                          |                          |                          |                          |                          |                          |                          |                          |                                     |                          |
|---------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|-------------------------------------|--------------------------|
| Lesson: | 1.1                      | 1.2                      | 1.3                      | 1.4                      | 2.1                      | 2.2                      | 2.3                      | 2.4                      | 3.1                      | 3.2                      | 3.3                      | 4.1                                 | 4.2                      |
|         | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |

ETT-C. Interpret and analyze data for a single count or measurement variable.

ETT-C.1 Represent data for a single count or measurement with plots on the real number line, such as dot plots, histograms, and box plots.

|         |                          |                                     |                          |                          |                          |                          |                          |                          |                          |                          |                          |                                     |                          |
|---------|--------------------------|-------------------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|-------------------------------------|--------------------------|
| Lesson: | 1.1                      | 1.2                                 | 1.3                      | 1.4                      | 2.1                      | 2.2                      | 2.3                      | 2.4                      | 3.1                      | 3.2                      | 3.3                      | 4.1                                 | 4.2                      |
|         | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> |

ETT-C.2 Use statistics appropriate to the shape of the data distribution to determine the center (median, mean) and spread (interquartile range, standard deviation) of a data set and/or compare data sets.

|         |                          |                          |                          |                          |                          |                          |                          |                          |                          |                          |                          |                                     |                          |
|---------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|-------------------------------------|--------------------------|

## Competencies, Domains, Objectives, Knowledge and Skills

FMS-B. Measure forces and distances and calculate mechanical advantage, work, power, and efficiency in mechanical systems.

FMS-B.1 Identify the equations to solve for mechanical advantage, work, and power.

|         |                                     |                                     |                          |                          |                          |                          |                          |                          |                          |                          |                          |                          |                          |
|---------|-------------------------------------|-------------------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|
| Lesson: | 1.1                                 | 1.2                                 | 1.3                      | 1.4                      | 2.1                      | 2.2                      | 2.3                      | 2.4                      | 3.1                      | 3.2                      | 3.3                      | 4.1                      | 4.2                      |
|         | <input checked="" type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |

FMS-B.2 Measure forces and distances related to mechanisms.

|         |                                     |                          |                          |                          |                          |                          |                          |                          |                          |                          |                          |                          |                          |
|---------|-------------------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|
| Lesson: | 1.1                                 | 1.2                      | 1.3                      | 1.4                      | 2.1                      | 2.2                      | 2.3                      | 2.4                      | 3.1                      | 3.2                      | 3.3                      | 4.1                      | 4.2                      |
|         | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |

FMS-B.3 Calculate mechanical advantage and drive ratios of mechanisms.

|         |                                     |                          |                          |                          |                          |                          |                          |                          |                          |                          |                          |                          |                          |
|---------|-------------------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|
| Lesson: | 1.1                                 | 1.2                      | 1.3                      | 1.4                      | 2.1                      | 2.2                      | 2.3                      | 2.4                      | 3.1                      | 3.2                      | 3.3                      | 4.1                      | 4.2                      |

## Competencies, Domains, Objectives, Knowledge and Skills

FMS-C. Analyze parallel and series circuits resistance, current, and voltage using Ohm's law.

FMS-C.1 Identify the equations to calculate the resistance, current, and voltage of simple circuits.

|         |                          |                                     |                          |                          |                          |                          |                          |                          |                          |                          |                          |                          |                          |
|---------|--------------------------|-------------------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|
| Lesson: | 1.1                      | 1.2                                 | 1.3                      | 1.4                      | 2.1                      | 2.2                      | 2.3                      | 2.4                      | 3.1                      | 3.2                      | 3.3                      | 4.1                      | 4.2                      |

## Competencies, Domains, Objectives, Knowledge and Skills

FMS-C. Apply statistical analysis to determine central tendency, mean, median, and mode.

FMS-C.1 Calculate the variation in a set of data, including range, standard deviation, and variance.

|         |                          |                          |                          |                          |                          |                          |                          |                          |                          |                          |                          |                                     |                          |
|---------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|-------------------------------------|--------------------------|
| Lesson: | 1.1                      | 1.2                      | 1.3                      | 1.4                      | 2.1                      | 2.2                      | 2.3                      | 2.4                      | 3.1                      | 3.2                      | 3.3                      | 4.1                                 | 4.2                      |

## Competencies, Domains, Objectives, Knowledge and Skills

FMS-F. Describe the location of a projectile in motion as a function of time.

FMS-F.1 Identify formulas related to motion of a projectile.

|         |                          |                          |                          |                          |                          |                          |                          |                          |                          |                          |                          |                          |                                     |
|---------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|-------------------------------------|
| Lesson: | 1.1                      | 1.2                      | 1.3                      | 1.4                      | 2.1                      | 2.2                      | 2.3                      | 2.4                      | 3.1                      | 3.2                      | 3.3                      | 4.1                      | 4.2                                 |
|         | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> |

FMS-F.2 Calculate the location of a projectile at a specified time.

|         |                          |                          |                          |                          |                          |                          |                          |                          |                          |                          |                          |                          |                                     |
|---------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|-------------------------------------|
| Lesson: | 1.1                      | 1.2                      | 1.3                      | 1.4                      | 2.1                      | 2.2                      | 2.3                      | 2.4                      | 3.1                      | 3.2                      | 3.3                      | 4.1                      | 4.2                                 |

Materials and Structures (MAS):

The integrity of physical systems is dependent on their material properties and structural design.

MAS-A. Draw free body diagrams of objects, identifying all forces acting on the object.

MAS-A.1 Differentiate between scalar and vector quantities.

|         |                          |                          |                          |                          |                                     |                          |                          |                          |                          |                          |                          |                          |                          |
|---------|--------------------------|--------------------------|--------------------------|--------------------------|-------------------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|
| Lesson: | 1.1                      | 1.2                      | 1.3                      | 1.4                      | 2.1                                 | 2.2                      | 2.3                      | 2.4                      | 3.1                      | 3.2                      | 3.3                      | 4.1                      | 4.2                      |
|         | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |

MAS-A.2 Identify the magnitude, direction, and sense of a vector.

|         |                          |                          |                          |                          |                                     |                          |                          |                          |                          |                          |                          |                          |                          |
|---------|--------------------------|--------------------------|--------------------------|--------------------------|-------------------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|
| Lesson: | 1.1                      | 1.2                      | 1.3                      | 1.4                      | 2.1                                 | 2.2                      | 2.3                      | 2.4                      | 3.1                      | 3.2                      | 3.3                      | 4.1                      | 4.2                      |
|         | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |

MAS-A.3 Explain how the forces acting on an object are in equilibrium.

|         |                          |                          |                          |                          |                                     |                          |                          |                          |                          |                          |                          |                          |                          |
|---------|--------------------------|--------------------------|--------------------------|--------------------------|-------------------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|
| Lesson: | 1.1                      | 1.2                      | 1.3                      | 1.4                      | 2.1                                 | 2.2                      | 2.3                      | 2.4                      | 3.1                      | 3.2                      | 3.3                      | 4.1                      | 4.2                      |
|         | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |

MAS-A.4 Understand how Newton's Laws are applied to determine the forces acting on an object.

|         |                          |                          |                          |                          |                                     |                          |                          |                          |                          |                          |                          |                          |                          |
|---------|--------------------------|--------------------------|--------------------------|--------------------------|-------------------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|
| Lesson: | 1.1                      | 1.2                      | 1.3                      | 1.4                      | 2.1                                 | 2.2                      | 2.3                      | 2.4                      | 3.1                      | 3.2                      | 3.3                      | 4.1                      | 4.2                      |
|         | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |

MAS-A.5 Create free body diagrams of objects, identifying all forces acting on the object.

|         |                          |                          |                          |                          |                                     |                          |                          |                          |                          |                          |                          |                          |                          |
|---------|--------------------------|--------------------------|--------------------------|--------------------------|-------------------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|
| Lesson: | 1.1                      | 1.2                      | 1.3                      | 1.4                      | 2.1                                 | 2.2                      | 2.3                      | 2.4                      | 3.1                      | 3.2                      | 3.3                      | 4.1                      | 4.2                      |

## Competencies, Domains, Objectives, Knowledge and Skills

MAS-B. Calculate moment of inertia, beam deflection, and moments or torques.

MAS-B.1 Know that beam deflection is related to cross-sectional geometry and material properties.

|         |                          |                          |                          |                          |                                     |                          |                          |                          |                          |                          |                          |                          |                          |
|---------|--------------------------|--------------------------|--------------------------|--------------------------|-------------------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|
| Lesson: | 1.1                      | 1.2                      | 1.3                      | 1.4                      | 2.1                                 | 2.2                      | 2.3                      | 2.4                      | 3.1                      | 3.2                      | 3.3                      | 4.1                      | 4.2                      |
|         | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |

MAS-B.2 Know that the moment of inertia is related to cross-sectional geometry.

|         |                          |                          |                          |                          |                                     |                          |                          |                          |                          |                          |                          |                          |                          |
|---------|--------------------------|--------------------------|--------------------------|--------------------------|-------------------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|
| Lesson: | 1.1                      | 1.2                      | 1.3                      | 1.4                      | 2.1                                 | 2.2                      | 2.3                      | 2.4                      | 3.1                      | 3.2                      | 3.3                      | 4.1                      | 4.2                      |

## Competencies, Domains, Objectives, Knowledge and Skills

MAS-D. Conduct non-destructive tests for material properties.

MAS-D.1 Conduct non-destructive tests for material properties on selected common household products, including tests for continuity, ferrous metal, hardness, and flexure.

|         |                          |                          |                          |                          |                          |                                     |                          |                          |                          |                          |                          |                          |                          |

|         | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |

## Competencies, Domains, Objectives, Knowledge and Skills

### Control Systems (CSY):

A control system is integrated into a larger system as a means to coordinate input and output devices.

CSY-A. Distinguish between digital and analog data, and the inputs and outputs of a computational system.

CSY-A.1 Distinguish between digital and analog data, and between the inputs and outputs of a computational system.

|         |                          |                          |                          |                          |                          |                          |                          |                          |                                     |                          |                          |                          |                          |
|---------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|-------------------------------------|--------------------------|--------------------------|--------------------------|--------------------------|
| Lesson: | 1.1                      | 1.2                      | 1.3                      | 1.4                      | 2.1                      | 2.2                      | 2.3                      | 2.4                      | 3.1                                 | 3.2                      | 3.3                      | 4.1                      | 4.2                      |
|         | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |

CSY-B. Describe differences and advantages of open- and closed-loop systems.

CSY-B.1 Distinguish between open- and closed-loop systems based on whether decisions are made using time delays or sensor feedback.

|         |                          |                          |                          |                          |                          |                          |                          |                          |                                     |                          |                          |                          |                          |
|---------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|-------------------------------------|--------------------------|--------------------------|--------------------------|--------------------------|
| Lesson: | 1.1                      | 1.2                      | 1.3                      | 1.4                      | 2.1                      | 2.2                      | 2.3                      | 2.4                      | 3.1                                 | 3.2                      | 3.3                      | 4.1                      | 4.2                      |
|         | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |

CSY-B.2 Identify the relative advantage of an open-loop or closed-loop control system for a given technological problem.

|         |                          |                          |                          |                          |                          |                          |                          |                          |                                     |                          |                          |                          |                          |
|---------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|-------------------------------------|--------------------------|--------------------------|--------------------------|--------------------------|
| Lesson: | 1.1                      | 1.2                      | 1.3                      | 1.4                      | 2.1                      | 2.2                      | 2.3                      | 2.4                      | 3.1                                 | 3.2                      | 3.3                      | 4.1                      | 4.2                      |
|         | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |

CSY-C. Create a flowchart, pseudocode, and computer program to implement an algorithm.

CSY-C.1 Create a flowchart to describe an algorithm.

|         |                          |                          |                          |                          |                          |                          |                          |                          |                                     |                          |                          |                          |                          |
|---------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|-------------------------------------|--------------------------|--------------------------|--------------------------|--------------------------|
| Lesson: | 1.1                      | 1.2                      | 1.3                      | 1.4                      | 2.1                      | 2.2                      | 2.3                      | 2.4                      | 3.1                                 | 3.2                      | 3.3                      | 4.1                      | 4.2                      |
|         | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |

CSY-C.2 Create pseudocode to describe an algorithm.

|         |                          |                          |                          |                          |                          |                          |                          |                          |                                     |                          |                          |                          |                          |
|---------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|-------------------------------------|--------------------------|--------------------------|--------------------------|--------------------------|
| Lesson: | 1.1                      | 1.2                      | 1.3                      | 1.4                      | 2.1                      | 2.2                      | 2.3                      | 2.4                      | 3.1                                 | 3.2                      | 3.3                      | 4.1                      | 4.2                      |
|         | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |

CSY-C.3 Analyze and describe an algorithm represented as a flowchart or as programming code.

|         |                          |                          |                          |                          |                          |                          |                          |                          |                                     |                          |                          |                          |                          |
|---------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|-------------------------------------|--------------------------|--------------------------|--------------------------|--------------------------|
| Lesson: | 1.1                      | 1.2                      | 1.3                      | 1.4                      | 2.1                      | 2.2                      | 2.3                      | 2.4                      | 3.1                                 | 3.2                      | 3.3                      | 4.1                      | 4.2                      |
|         | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |

CSY-C.4 Create a computer program to implement an algorithm, including conditional statements and iterations.

|         |                          |                          |                          |                          |                          |                          |                          |                          |                                     |                          |                          |                          |                          |
|---------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|-------------------------------------|--------------------------|--------------------------|--------------------------|--------------------------|
| Lesson: | 1.1                      | 1.2                      | 1.3                      | 1.4                      | 2.1                      | 2.2                      | 2.3                      | 2.4                      | 3.1                                 | 3.2                      | 3.3                      | 4.1                      | 4.2                      |

## Competencies, Domains, Objectives, Knowledge and Skills

CSY-D. Predict the behavior of a control system and use a variety of methods for finding, identifying, and correcting bugs in a program.

CSY-D.1 Based on given needs and constraints, design and create a control system, including the inputs, computer program, and outputs.

|         |                          |                          |                          |                          |                          |                          |                          |                          |                                     |                          |                          |                          |                          |
|---------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|-------------------------------------|--------------------------|--------------------------|--------------------------|--------------------------|
| Lesson: | 1.1                      | 1.2                      | 1.3                      | 1.4                      | 2.1                      | 2.2                      | 2.3                      | 2.4                      | 3.1                                 | 3.2                      | 3.3                      | 4.1                      | 4.2                      |
|         | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input checked="" type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> | <input type="checkbox"/> |

CSY-D.2 Predict the behavior of a control system by examining the program it is going to execute.

|         |                          |                          |                          |                          |                          |                          |                          |                          |                                     |                          |                          |                          |                          |
|---------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|--------------------------|-------------------------------------|--------------------------|--------------------------|--------------------------|--------------------------|
| Lesson: | 1.1                      | 1.2                      | 1.3                      | 1.4                      | 2.1                      | 2.2                      | 2.3                      | 2.4                      | 3.1                                 | 3.2                      | 3.3                      | 4.1                      | 4.2                      |
